ECE 402 Deliverables

1. Digital framework for modular system
   a. layout and extraction
2. Inverter delay module
   a. design and layout
   b. extraction and characterization
3. Poly-resistance module
   a. design and layout
   b. extraction and characterization
   c. comparative test structure analysis
4. Documentation
   a. specification sheet
   b. documentation for future design groups
   c. planned expansions
